Mr. George Beamer
Product Development Engineer
Interpace Industries, Inc.
Mica, Washington 99023

Dear Mr. Beamer:

Re: Permitting Requirements, M/057/003, Pleasant View Mine, Weber
County, Utah

Enclosed is a copy of Interpace's permit application for the Pleasant View Mine. Please check it over thoroughly to make sure that it is consistent with your current operation and plans. Before we can approve the permit, we will require that you commit to a revegetation plan, rather than test plots. Please prepare a new page three and four for Attachment A (Mining and Reclamation Plan) to reflect this change. As requested, I have enclosed a copy of Frank Jensen's revegetation recommendations for your use.

The second page of the permit application states that Interpace desires all information contained in the permit be treated as confidential. The Division will hold information relating to the location, size, or nature of the deposit as confidential if so requested. The maps that accompanied the permit application are currently in our confidential file. It does not appear that these maps contain confidential information. Would you please review these maps, as well as the permit, to see if any portions should be protected as confidential. From a practical point of view, the Division would prefer to keep the entire permit together and in the public documents room.

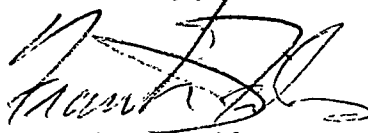

Before final permit approval can be obtained, it will be necessary for Interpace to post a reclamation surety. Enclosed is an informational packet which discusses the various types of bonds which the Division accepts. We recommend that you submit a reclamation estimate to assist the Division in calculating the required amount of surety.

I have enclosed a blank copy of the Division's current permit form (Form MR-1). It is not necessary to fill out this form, unless you find the original permit application to be unworkable.

Thank you again for meeting with us. Your cooperation has been most appreciated. If you should have any questions, or need additional information, please contact me or Frank Jensen.

Sincerely,

A handwritten signature in black ink, appearing to read "Frank J. Filas", written over a horizontal line.

Frank J. Filas
Reclamation Engineer

Attachment A

INTERPACE INC.

North Ogden Pit

Suggested Seed Mixture

	lbs./acre
Intermediate wheatgrass	5
Bluebunch wheatgrass	5
Bulbous bluegrass	2
Ladak alfalfa (or other dry land type)	3
Big sage brush	2
Bitterbrush	2
Rabbitbrush	<u>1</u>

Reshape pit - put back two feet of suitable soil material.

Prepare seedbed by ripping or discing.

Plant seed with drill or hand broadcast, then harrow or rake in seed
1/4" - 1/2" deep - preferably in the fall.

Put on 200 lbs./acre of fertilizer at time of seeding. (Diammonium
phosphate/18-46-0)

Original ground cover - 50%.
